

MAPLETON SCHOOL DISTRICT NO. 32
10868 East Mapleton Road
Mapleton, OR 97453
(541) 268-4312 Fax 541-268-4632

HEALTHY AND SAFE SCHOOLS PLAN

Introduction

Each school district, education service district, and public charter school must develop a Healthy and Safe Schools Plan for all buildings owned or leased by the school district or public charter school where students and staff are present on a regular basis.

School districts, education service districts, and public charter schools must submit a preliminary draft of the Healthy and Safe Schools Plan to the Department of Education on or before **October 1, 2016**. School districts, education service districts, and public charter schools must submit the final draft of the Healthy and Safe Schools Plan to the Department of Education on or before **January 1, 2017**. Thereafter, school districts, education service districts, and public charter schools must annually submit an updated Healthy and Safe Schools Plan if new buildings are acquired, constructed, or leased or if the plan is modified by the school district, education service district, or public charter school.

Mapleton School District's Healthy and Safe Schools Plan is based on the model provided by the Oregon Department of Education. Sections 1-7 of this plan set forth the required elements of a Healthy and Safe Schools. Community members can access a copy of the Healthy & Safe Schools plan on the district website under State Reports: www.mapleton.k12.or.us

1. Responsible Person

OAR 581-022-2223(5)(a) states that the Healthy and Safe Schools Plan must include the position within the school district's or public charter school's administration responsible for maintaining and implementing the Healthy and Safe Schools Plan.

The person responsible for maintaining and implementing the Healthy and Safe Schools Plan is:

Position: **Superintendent and Maintenance/Transportation Supervisor**

Contact information: **541-268-4312**

2. List of Buildings

OAR 581-022-2223(5)(b) states that the Healthy and Safe Schools Plan must include a list of all facilities that are included in the Healthy and Safe Schools Plan.

This plan covers the following buildings:

Building Name	Building Address
Mapleton High School	10868 E. Mapleton Road, Mapleton, Or 97453
Mapleton Elementary School	10870 E. Mapleton Road, Mapleton, Or 97453
Mapleton Middle School	10868 E. Mapleton Road, Mapleton, Or 97453

3. Radon

OAR 581-022-2223(5)(c) states that the Healthy and Safe Schools Plan must include a plan to test for elevated levels of radon as required under ORS 332.167. Note: radon measurement plans from school districts were due to OHA on September 1, 2016.

Radon measurement resources for schools:

- Oregon Health Authority's radon measurement protocol, tools, and plan submission information are located here:
<http://public.health.oregon.gov/HealthyEnvironments/HealthyNeighborhoods/RadonGases/Pages/Testing-in-Schools-.aspx>
- Oregon School Boards Association (OSBA) has a generic plan (based on OHA's protocol) that may be used to satisfy the requirement if printed out on district letterhead and signed by district staff. It is located here:
http://www.osba.org/News%20Center/Announcements/2016-07-18_RadonTestingPlan.aspx

The district has developed a radon plan as required by ORS 332.167. Community members can access a copy of the radon plan by contacting Mapleton School District Office at 541-2658-4312. Test results will be made public and posted to the district website under state reports Radon Testing: www.mapleton.k12.or.us

4. Lead in Drinking water

OAR 581-022-2223(5)(d) states that the Healthy and Safe Schools Plan must include a plan to test for and reduce exposure to lead in water used for drinking or food preparation. If the district, education service district, or public charter school does conduct lead testing of drinking water, an Oregon Health Authority accredited lab must be used for all testing.

The Oregon Department of Education and the Oregon Health Authority recommend that all school districts and childcare facilities test for lead in school water and take corrective action if lead levels are elevated.

In developing a plan to test for and reduce exposure to lead in water used for drinking or food preparation, the following components are recommended by the Oregon Department of Education and the Oregon Health Authority:

1. **Identify sources of lead:** *Schools and childcare facilities should test all taps used for drinking or food preparation in the building to identify any lead problems. Follow the Environmental Protection Agency's 3 T's Revised Technical Guidance to ensure that samples for lead are collected properly and from the right places. Use an OHA-accredited drinking water laboratory to analyze samples for lead.*

Mapleton School District tested all water taps used for drinking or in food preparation in all school district buildings (middle school, high school and elementary school) in August of 2016. Analytical Laboratory Group in Eugene, Oregon, an OHA-accredited drinking water laboratory, completed the testing.

Following testing, all water taps that produced Lead Testing results higher than 20 parts per billion of lead will be retested on a yearly basis (in June of each school year). This will allow for any concerns to be addressed during the summer months.

2. **Stop access:** *Prevent access to water taps that have more than 20 parts per billion (ppb) of lead. This should include shutting off taps, covering water fountains, and providing bottled water to students and staff members.*

Following lead testing, all water taps that produced Lead Testing results higher than 20 parts per billion of lead were shut off or plumbing fixtures were replaced. Retesting was done once fixtures and plumbing were replaced. If necessary, bottled water will be provided for students and staff.

3. **Communicate:** *Make results from tests for lead in water available to students, families, and the community as quickly as possible.*

Lead testing results will be made available to all students, families and the community within 5 days of completed testing. Communication will include any remedies or actions taken to mitigate the situation. Test results will be made public and posted to the district website under state reports Lead Testing:

www.mapleton.k12.or.us

4. **Mitigate and correct:** *Replace the sources of lead in building plumbing. Again, EPA 3T's Guidance should be followed.*

The EPA's 3Ts technical guidance is available here:

https://www.epa.gov/sites/production/files/2015-09/documents/toolkit_leadschools_guide_3ts_leadschools.pdf

Mapleton School District will follow the EPA 3T's Guidelines to mitigate and correct any occurrence of lead higher than 20 parts per billion.

5. Lead Paint

OAR 581-022-2223(5)(e) states that the Healthy and Safe Schools Plan must include a plan to reduce exposure to lead paint that includes the following compliance with the United States Environmental Protection Agency's Renovation, Repair and Painting Program Rule.

The Renovation, Repair and Painting Program Rule requires that individuals and firms conducting renovation, repair and painting projects on pre-1978 homes and "child-occupied facilities" be certified to follow lead-safe work practices. "Child-occupied facilities" is defined in OAR 333-070-0085.

For more information on the Renovation, Repair and Painting Program Rule, you can visit the following website:

<https://public.health.oregon.gov/HealthyEnvironments/HealthyNeighborhoods/LeadPoisoning/ChildCareSchools/Pages/RulesforRenovating.aspx>

In order to comply with the United States Environmental Protection Agency's Renovation, Repair and Painting Program Rule, Mapleton School District will only contract with certified lead based paint renovation contractors licensed by the Oregon Construction Contractors Board.

6. Integrated Pest Management

OAR 581-022-2223(5)(f) states that the Healthy and Safe Schools Plan must include a plan to implement integrated pest management (IPM) practices as required under ORS 634.700 through 634.750.

The Oregon State University School IPM Program has created two model plans to assist districts. The model plans are attached. However, a school governing body may adopt any integrated pest management plan that complies with the requirements of ORS 634.700 through 634.750.

If a district chooses to use an Oregon State University model plan template, the plan must be modified by the specific school district or public charter school to fit their unique situation.

The district has adopted an integrated pest management plan as required by ORS 634.700 through 634.750. Community members can access a copy of the IPM plan here:

<http://policy.osba.org/mapletn/E/EBB%20R%20D1.PDF>

7. Communication

OAR 581-022-2223(5)(g) states that the Healthy and Safe Schools Plan must include a plan to communicate results for all tests performed in accordance with the Healthy and Safe Schools Plan that includes the following:

- *The school district or public charter school must make all test results available to the public within five business days of receiving the results;*

- *The school district or public charter school must make the results available to the public by posting the results on the school district or public charter school website, sending notice of the results over the email system, and making the results available in hardcopy at the main administration office; and*
- *The school district or public charter school must provide detailed information explaining the test results.*

The district will make all test results and detailed information explaining the test results available to the public within five business days of receiving the results. Results will be made available by posting the results on the district website, making the results available (upon request) through email and in hardcopy at the main administration office.
